

Let's raise a glass to success

Rotary Lobe Pumps for the Beverage Industry

Media

- Beer
- Carbonated Soft Drinks
- Coffee Liquor
- Fruit Juice Concentrates
- Milk Drinks
- Sugar Solutions
- Wine
- Yeast Slurries

Application

- Bottling
- Fermentation
- Filling
- Filtration
- Mixing
- Pasteurisation
- Tanker Loading
- Transfer

As a recognised market leader in pumping technology SSP has been at the forefront of supplying rotary lobe pumps to the beverage industry for over 50 years.

Handling from low to high viscosity pumped media, the pump's reliable characteristic smooth low shear pumping action is ideal for delicate media such as organic solids in suspension, creams, froths and mixtures.

The SSP Advantage

- **Hygienic construction**
Non-contacting pumphead design with all metallic pumped media wetted components manufactured in 316L stainless steel.
- **Cost effective easy maintenance**
Low running and maintenance costs and easy access to pumphead minimising downtime, results in a reduced lifecycle cost (LCC).
- **High volumetric efficiency**
Maximised efficiency achieved with optimum pumphead geometry by maintaining high accuracy and repeatability of component part manufacture.

- **Low shear pumping**

Minimal damage to extremely shear sensitive cultured media, such as yeast slurries.

- **CIP/SIP ability**

Temperatures up to 200°C

Series S pump in a major brewery

Rotary Lobe Pumps - *Right first time, every time*

SSP offers the broadest range of rotary lobe pumps available in the world today, channelled exclusively through a selected worldwide distribution network, and directly from the company's production facility located in Eastbourne, England.

Series L

SSP Series L stainless steel rotary lobe pumps provide the simple solution to many processes.

- Flow rates up to 48 m³/h
- Differential pressures up to 8 bar
- Port sizes 40 - 80 mm

Series S

SSP Series S stainless steel rotary lobe pumps suitable for a variety of process and transfer applications.

- Flow rates up to 106 m³/h
- Differential pressures up to 20 bar
- Port sizes 25 - 150 mm

Rheology Testing

In specifying a rotary lobe pump for a particular application, a crucial consideration is an understanding of how the pumped media will behave in the pump, connecting pipe work and associated equipment.

Our on-site laboratory is equipped with a computerised rheometer to be able to determine a fluids viscous behaviour. As the only rotary lobe pump manufacture in Europe with this facility that we know of, we feel this service is invaluable ensuring our philosophy of right first time, every time.

Application Experience

When you approach SSP for advice, you get access to the largest accumulation of processing expertise and application know-how in the world. With our unrivalled application experience you can be sure the SSP pump specified will be the right one for the job. First time, every time.
